Full Stack Web Developer with 3 years of experience in creating and maintaining websites, web applications, REST APIs, and various integrations. Delivering solutions with an excellent user experience that values security and the availability of information, as well as new functionality and integrations with other web systems and APIs, reaching thousands of users and scaling projects in companies such as AMBEV, VALE, Santander Bank. Using, Javascript, Typescript, ReactJS, Python, C#/ASP.Net, HTML, and CSS.

EXPERIENCE

LG Lugar de Gente   (2021/06/16 - Present)
Full Stack Developer

LG specializes in technology solutions for human resources management, with almost 1000 employees. Here, I work on the development, testing, and implementation of customized solutions for clients, having direct contact with them, many of whom are large companies such as Pfizer Labs, Carrefour, Lenovo, PwC, Deloitte, etc.
I developed REST and SOAP API applications, front and backend web applications, and integrations with external services such as Gupy/Kenoby using C#, ASP.NET Core, .NET Framework, HTML, CSS, Javascript, Oracle, SQL Server, and ReactJS.

Freelancer   (2020/01/30 - Present)
Full Stack Developer

As a freelancer, I primarily work on web development but also do general software development. For web development, I design and develop responsive websites such as **PBD**, **Magnify**, and **PixAnonimo** using pure HTML, CSS, Javascript, ReactJS, and Typescript.
In software development, I have automated the purchase and sale of products, created a Web Scrapper, automated the purchase and sale of cryptocurrencies, and developed an app for tracking project/activity hours, among others, using ReactJS, Electron, NodeJS, and Python. You can see more projects on my **gitHub** and on my **personal website**, which is still under development.

Inforsystem   (2020/06/12 - 2021/06/15)
Full Stack Developer

Inforsystem is a technology company that provides a complete business management system (ERP, Electronic Billing, Bank Movement, NF-e, SPED, etc.), legacy and in the cloud, for small and medium-sized businesses. Here, I maintained all modules of the system and developed new functionality such as integrating the system with Mercado Livre, a marketplace with more than 211 million users, allowing clients to register their products on this platform. We used C#, ASP.NET Core, .NET Framework, HTML, CSS, Javascript, Python, Firebird, and Delphi.

JBS   (2016/12/04 - 2018/12/01)
Mechanical Engineer

JBS is one of the global leaders in the food industry, with headquarters in more than 20 countries. Here I worked as a mechanical engineer, responsible for the projects of a unit. My main activities were the development of memorials for future works, team management and project management, with an annual budget of millions of reais. The most important project that I was responsible, was the biggest project of the year that least 6 months and cost approximately 20 million reais. I was one of the engineers responsible for leading the teams with almost 100 employees.

FORMAÇÃO

UniGoiás   (2020/06/01 - Present)   ### Federal University of Mato Grosso   (2010/08/04 - 2015/12/12)
Technology, System analysis and   Bachelor, Mechanical Engineer
development
